PROFESSIONAL SUMMARY

Eager and dedicated Information Technology professional with hands-on experience in full-stack web development, AI-powered applications, and mobile development. Proven ability to lead projects from concept to deployment using modern frameworks like Django and Ionic. Currently serving as a Tester and Support Specialist at iNNsite PH, I leverage a strong background in Software Quality Assurance and technical evaluation to ensure the delivery of high-quality, reliable digital solutions.

EDUCATION

Bachelor of Science in Information Technology *Mindoro State University- Main Campus | Alcate, Victoria, Oriental Mindoro*

Secondary Education *Aurelio Arago National High School | Alcate Victoria Oriental Mindoro 2016-2020, Macatoc National High School | Macatoc, Victoria, Oriental Mindoro 2020 – 2022*

Primary Education *Minas Elementary School | Alcate, Victoria, Oriental Mindoro 2010 – 2016*

PROFESSIONAL EXPERIENCE

Tester and Support Specialist | iNNsite PH

April 2026 – Present

- Execute comprehensive testing protocols to ensure system stability and performance for client applications.
- Provide dedicated technical support, troubleshooting user-reported issues and coordinating with development teams for rapid resolution.
- Assist in maintaining high-quality standards across software deployments.

Quality Assurance Intern (OJT) | iNNSite IT Solutions Agency

February 2026 – April 2026

- Completed a 486-hour internship specializing in Software Quality Assurance and technical system evaluation.
- Conducted functional and usability testing for four e-commerce applications across Web and Mobile platforms.
- Utilized ISO 25010 standards and the UTAUT framework to assess system reliability and user acceptance scores.

TECHNICAL SKILLS

- **Languages:** Python, PHP, C#
- **Frameworks:** Django, Ionic, Angular
- **AI & Machine Learning:** CNN (Convolutional Neural Networks), Image Processing.
- **Design & Tools:** Visual Studio Code, Git, Canva.
- **Testing & QA:** Manual Testing, Software Quality Assurance, ISO 25010 Evaluation, UTAUT Framework

PROJECTS/ EXPERIENCES

BANAe-Scan | Lead Developer (2024–2025) - Developed a CNN-powered web application for banana disease detection and variety identification, integrated with a full-featured e-commerce platform.

Communex | Back-End Developer (2025) - Developed the back-end system for an Ionic-based mobile application for community announcements, events, and attendance management.

E-HealthCare | Lead Developer (2023–2024) - Developed a community health access system enabling local health departments to deliver digital services to residents in designated sitios.

Water Refilling System | Desktop Application Developer (2023–2024) - Developed a C# desktop-based system for managing sales, inventory, and cost tracking.
